BOTTOM-LINE RECOMMENDATION

WATCHLIST Strong occupancy and below-market rents suggest value-add potential, but the 4.77% broker cap rate is thin for the San Antonio market. Missing debt stack data limits the ability to assess seller motivation. The property is worth tracking — revisit if basis improves or loan maturity pressure surfaces. Next move: Request the rent roll and T12 operating statement to validate unit-level rents and expense assumptions.

● **HIGH confidence** — 7/9 data sources returned results. Missing: deed_lookup, maturity_estimator.
