DIVERSE AND TARGETED PRIVATE REAL ESTATE PLATFORM

ARA CORE PROPERTY FUND

Strong income and potential for long-term appreciation through investment in high-quality income-oriented core office, industrial, retail, and residential properties located in major markets nationwide.

FUND TYPE	GROSS AUM	RETURN TARGET	LIQUIDITY
Open-End	\$8.51B Gross	7-9% Gross	Quarterly

AMERICAN STRATEGIC VALUE REALTY FUND

Focuses on a value creation investment strategy through exploiting market inefficiencies, operational improvement, and redeveloping or manufacturing core real estate product.

FUND TYPE	GROSS AUM	RETURN TARGET	LIQUIDITY
Open-End	\$3.43B Gross	11-14% Gross	Quarterly

ARA ESSENTIAL HOUSING FUND

Will focus on investing in residential for-rent housing to provide investors with a defensive income and appreciation strategy. Will incorporate natural IMPACT investing in support of long-term affordable rental housing for essential working population.

FUND TYPE	GROSS AUM	RETURN TARGET	LIQUIDITY
Open-End	In Initial Fundraising	10-12% Gross	Quarterly

SEPARATE ACCOUNTS

ARA also offers customized core/core-plus/value strategies through separate accounts, as well as specialized portfolio takeover/repositioning/disposition services.

Data as of June 30, 2022, unless specified otherwise. The return targets above are estimates based on information available at the time of forecasting and are not guarantees of future results. Please refer to the performance disclaimer and other disclosures at the end of this presentation. The Value Fund expects to target a portfolio of investments that, in aggregate, will be projected to generate gross leveraged internal rates of return of 11%-14%.

PERFORMANCE HISTORY

- The ARA Core Property Fund has outperformed the NFI-ODCE benchmark over the quarter, 1-, 3-, and 5-year time periods and ranked in the second quartile amongst its peers over the quarter, 1-, 3-, 5-, and 10-year time periods.
- Majority of total return since inception comes from income.
- Performance has been achieved within the strict guidelines of NFI-ODCE since inception.
- Increasing outperformance margin indicates momentum.

The ARA Core Property Fund returns include leveraged returns before (gross) the deduction of investment management fees and reflect the reinvestment of some income. The returns are calculated at the Core Fund level and may not be reflective of the actual performance returns experienced by any one investor. Returns for periods of greater than one year are annualized. The sum of annualized component returns may not equal the total return due to the chain-linking of quarterly returns. Past performance is not a guarantee of future results. Please refer to the NFI-ODCE benchmark information, performance disclaimer and other disclosures at the end of this presentation.

PORTFOLIO POSITIONING STRATEGY

Overweight industrial and residential, underweight office and retail.

INDUSTRIAL
Overweight
Target: 34%

- Continue to overweight logistics oriented industrial to capitalize on e-commerce distribution demand.
- COVID-19 has accelerated logistics demand beyond dry-dock warehousing to include temperature-controlled facilities and data centers.

RESIDENTIAL
Overweight
Target: 30%

- Natural expansion of high conviction property types beyond traditional apartments.
- Suburban detached and townhome purpose built rental housing communities have strong renter appeal and are expected to outperform over the near to mid term.

OTHER
Neutral
Target: 0%-10%

- Consistent with "sheds, beds and tech" investment themes, identify opportunities in data centers, self-storage, and possibly other types of rental housing.
- Explore adaptive reuse and mixed-use potential for underutilized assets.

OFFICE
Underweight
Target: 20%

- Underweight office as recovery is likely to be protracted, focusing on differentiated assets that can attract the best tenants.
- Best-in-class, differentiated office assets that comprise most of Fund office exposure expected to outperform.

RETAIL
Underweight
Target: 10%

- Continue to underweight retail, particularly discretionary formats focusing on necessity-based, grocery-anchored properties.
- No exposure to regional malls, outlets, or stand-alone retailers.

There is no guarantee that the Fund will achieve the targets described above. Please refer to the disclosures at the end of this presentation.

COMPETITIVE EDGE AND DIVERSIFICATION ACROSS MARKETS AND PROPERTY TYPES

77 property investments across 21 market regions.

GEOGRAPHIC DIVERSIFICATIONS

KEY OVERWEIGHTED MARKETS

- Central Texas (+468 bps)
- Seattle (+285 bps)
- Boston (+235 bps)
- Atlanta (+254 bps)
- South Florida (+65 bps)

Data is based on gross fair value as of June 30, 2022, and the Investment Exposure per Market and Geographic Diversification exclude investments in mortgage-backed certificates. San Francisco Bay Area includes San Francisco, San Jose, and East Bay. Southern California Area includes Los Angeles, Orange County, Inland Empire, and San Diego. Washington, DC Area includes Washington, DC, and Baltimore, Maryland.

WELL ALIGNED TENANCY AND LEASE ROLL EXPOSURE

- Commercial tenancy is aligned toward Logistics and Transportation, Technology and E-Commerce and E-Payment tenants backstopping our sheds and tech investment approach.
- 55% of commercial base rents are attributed to tenants who have in excess of \$1 billion in annual revenue.
- 10 largest tenants are: Amazon, AstraZeneca, FedEx, IBM, PATH, PTC, Safeway, SVB, UPS, and Visa.
 - Seven of the top 10 are in the S&P 500.
- Smooth commercial lease expiration schedule to minimize concentration risk.
- 2022-2023 expirations are 85% industrial and are 28% below current market rental rates allowing the Fund to capture increased income and inflation adjustments when rents are raised to market.

PERCENTAGE OF TOTAL BASE RENT BY BUSINESS SEGMENT

EXPIRING COMMERCIAL PORTFOLIO BY PROPERTY TYPE

ARA Internal research and estimates. Percentages in Percentage of Total Base Rent and Expiring Commercial Portfolio charts are based on the fund's commercial portfolio gross fair value as of June 30, 2022. Other represents the following business segments: Energy and Mining, Large Retail Trade, National Apparel, Architecture and Engineering, Housing and Construction, Telecommunications, National Health and Beauty, Other Professional Services, Real Estate Services, Government, Non-Profit, Utilities, and Education. Note: 10 Largest Tenants represent the parent organizations of the Fund's largest tenants based on percentage of total Fund revenue presented in alphabetical order.

2021 DISPOSITIONS

Reduced office and retail exposure.

- 2021 sales of office and retail investments totaling \$734.2 million realizing a weighted average unlevered IRR of 8.9%.
- Reduced office allocation from 35.8% to 25.8% and Midwest down from 10.2% to 5.1% in 2021.
- Assets sold at, or above, appraised values as investments with good stories are allowing us to position the portfolio toward the future without sacrificing gains today.

1K FULTON

- Chicago, IL, office
- Generated over \$114M during 5-year hold
- 7.4% IRR / 1.4 Equity Multiple

ONE FREEDOM PLAZA

- Washington, D.C., office
- Preferred equity
- 6.8% IRR / 1.4 Equity Multiple

153 TOWNSEND

- San Francisco, CA, office
- Renovated and expanded major tenant
- 12.9% IRR / 2.4 Equity Multiple

@FIRST

- San Jose, CA, retail
- Non-grocery anchored
- 5.7% IRR / 1.5 Equity Multiple

ST. JOHN'S TOWN CENTER

- Jacksonville, FL, retail
- Competitive buyer pool
- 6.8% IRR / 2.0 Equity Multiple

WALDORF MARKETPLACE WALGREENS

- Waldorf, MD, retail
- NNN lease Walgreens
- Strategic disposition

Data is as of June 30, 2022. IRR and Equity Multiples are unlevered. None of these returns reflect the deduction of investment management fees. The IRR and Equity Multiple for Waldorf Marketplace Walgreens is unavailable because it was a parcel sale out of an existing asset and certain allocations were not attributed to such parcel making a calculation not possible. Past performance is not a guarantee of future results. Please refer to the performance disclaimer and other disclosures at the end of the presentation

2021 INVESTMENTS

MIDDLETOWN LOGISTICS CENTER

- Central PA, industrial
- Constructed to target user-demand
- Currently under construction

PROVEN STRATEGY TO CREATE ALPHA

- Realized investment track record demonstrates ability to execute on Fund strategy.
- 20 realized investments since inception with a weighted average 20.4% realized gross IRR and a 1.5x multiple.
- Capitalized on strong performance in industrial, accounting for half of realized investments.
- \$1.34 billion gross sale proceeds since inception with 58% sold to core buyers upon exit.

REALIZED VS. UNDERWRITTEN GROSS IRR¹

% OF SALES BY PROPERTY TYPE²

Data as of June 30, 2022.

Realized Gross IRR, Realized Gross Multiple, and Underwritten Gross IRR are weighted by Fund equity contributions and exclude fees paid to the General Partner or Investment Manager by the Fund. The realized property type returns do not reflect investment management fees and other fees, which are calculated at the Fund level or the effect of cash held in the Fund at the Fund level and may not be reflective of the actual performance returns experienced by any one investor. Past performance is not a guarantee of future results. Please refer to the performance disclaimer and other disclosures at the end of the presentation.

¹ Since Fund inception.

² Percentage of sales by property type is based on total gross sales price. Debt investments are categorized under Property Type based on the underlying collateral property type and Investment Strategy. There have not been any Retail property sector realizations as of June 30, 2022.

PORTFOLIO STRATEGY RECENT DISPOSITIONS

Capitalizing on strong investor demand to yield return outperformance on dispositions

THE QUAD AT NORTH CAMBRIDGE SQUARE

Unique Place-Making Opportunity Focused on Life Sciences and Multifamily

- Assembled six parcels from three sellers on an off-market basis to create a 12-acre site in Cambridge, MA.
- Focused on entitling proposed 1.1 million sf transit-oriented, life sciences/residential master plan development.
- Optimized interim income through short-term leasing.
- Sold to a publicly-traded REIT focused on life sciences and healthcare-related real estate.

Market	Boston, MA	Size	11.9 acres with 145,491 sf (1,082,158 sf proposed)
Investment Date	Q3 2018	Quarter Sold	Q4 2021
Fund Equity Invested	\$83.7M	Realized Gross IRR / Multiple	14.18% / 1.48x (unlevered)

67 SMITH PLACE

Exploiting Inefficiencies During Market Disruption

- Senior bridge loan for an industrial acquisition/repositioning in Cambridge, MA, with existing partner/borrower.
- Initial funding of 57% with a total commitment at 68% loan-to-cost to renovate and re-lease.
- Capitalized on debt market disruption with an attractive 11.0% interest rate and 1.25x minimum multiple.
- Paid in full prior to maturity through a property sale to the same purchaser as The Quad at North Cambridge.

Market	Boston, MA	Size	66,964 sf

RECENT INVESTMENTS

Creating industrial and residential assets to target underserved demand

OSPREY LOGISTICS PARK

Manufacture Core Industrial

- Capitalize on growing last-mile industrial demand.
- Deliver state-of-the-art infill product in a market with strong population growth and barriers to entry.
- Robust investor appetite driving significant profit potential on exit.

Market	Fort Lauderdale, FL	Size	427,238 sf
Investment Date	Q4 2021	Total Cost	\$99.4M
Fund Equity	\$42.5M	Underwritten Gross IRR / Multiple	16.30% / 1.59x (Levered)

BRIDGES MURRIETA

Manufacture Core Multifamily

- Cater to moderate income households in desirable in-migration suburban market with limited new product.
- Capitalize on strong rent growth with demand outpacing current supply.
- Deliver new product in opportunity-starved capital market to drive attractive appreciation.

Market	Inland Empire, CA	Size (Phase I)	317 units
Investment Date	Q3 2021	Total Cost	\$136.8M
Fund Equity	\$48.2M	Underwritten Gross IRR / Multiple	13.55% / 1.46x (Levered)

Bridges Murrieta has 317 units in Phase I with 225 units planned for Phase II for a total of 542 units. Base case underwriting assumes Phase II land is sold with the completed Phase I project rather than developed, but the Fund has the option to develop Phase II. Any IRR or Equity Multiples referenced above are leveraged annualized projected returns, based on information as of the date of underwriting and not a guarantee of future results. Such projections do not reflect investment management fees and other fees, which are charged at the Fund level. Please refer to the performance disclaimer and other disclosures at the end of this presentation.

RECENT INVESTMENTS

Strategic focus uncovers compelling off-market acquisitions with value creation potential

CORTLAND WESTMINSTER

Restore to Core

- Target in-migration winners for multifamily investment in a desirable suburban location with limited new supply.
- Implement extensive unit and community enhancements to a 2003 vintage project with an established partner.
- Offer high-quality finishes and amenities at more affordable rents compared to new construction.

Market	Denver, CO	Size (Phase I)	504 units
Investment Date	Q1 2022	Total Cost	\$208.7M
Fund Equity	\$71.4M	Underwritten Gross IRR / Multiple	10.99% / 1.54x (Levered)

COTTAGES AT LEON CREEK

Exploit Market Inefficiencies

- Capitalize on disruption in student housing market.
- Convert to single-family rental to meet growing demand.
- Acquired off-market below replacement cost.

Market	San Antonio, TX	Size	284 units
Investment Date	Q2 2021	Total Cost	\$63.3M
Fund Equity	\$20.0M	Underwritten Gross IRR / Multiple	13.11% / 1.81x (Levered)

Any IRR or Equity Multiples referenced above are leveraged annualized projected returns, based on information as of the date of underwriting and not a guarantee of future results. Such projections do not reflect investment management fees and other fees, which are charged at the Fund level. Please refer to the performance disclaimer and other disclosures at the end of this presentation.

INVESTMENT PIPELINE

Strategic Capital Deployment into Industrial, Residential, and Specialty Sectors

AUSTIN, TX INDUSTRIAL DEVELOPMENT

- Infill, freeway-accessible site serving demand for last-mile logistics.
- Two rear-load buildings, 162,000 +/- sf.
- Forecasted favorable market rent growth.
- 16.27% underwritten levered IRR / 1.50x multiple.

INLAND EMPIRE, CA INDUSTRIAL DEVELOPMENT

- In-fill, freeway-accessible site serving demand for last-mile logistics.
- Planned single 240,000 +/- sf building with excess yard/trailer storage.
- Negotiated price adjustment to mitigate current capital market volatility.
- 15.0% underwritten levered IRR / 1.5x multiple (preliminary).

MIAMI, FL MULTIFAMILY REPOSITIONING

- Highly walkable, amenity rich Midtown and Design District adjacent location.
- Improve operations and implement strategic unit and common area upgrades to drive rent premiums.
- 13.29% underwritten levered IRR / 1.82x multiple.

CHARLOTTE, NC INDUSTRIAL DEVELOPMENT

- Capitalize on strong industrial market fundamentals driven by population and employment in-migration.
- Shovel ready for development of 280,000 sf distribution building.
- Land closing conditioned on GMP contract and construction financing.
- 13.0% underwritten levered IRR / 1.3x multiple (preliminary).

CENTRAL PA INDUSTRIAL DEVELOPMENT

- Off-market acquisition of 197 acres at highly attractive basis.
- Create value by entitling for 1,750,000, 3-building logistics park.
- Optionality on vertical development with additional value creation.
- 14.96% underwritten levered IRR / 1.64x multiple assuming full build-out.

NASHVILLE, TN TOWNHOME DEVELOPMENT

- Shovel ready, 96-unit BTR development.
- Underserved market where rent and home price inflation have significantly outpaced wage growth.
- 3- and 4-bedroom townhomes averaging 1,600 sf.
- 15.0% underwritten levered IRR / 1.7x multiple (preliminary).

CENTRAL FL AND CHARLOTTE NC INDUSTRIAL DEVELOPMENTS

- Two preferred equity investments
- 361,000 sf in 2-building park north of Tampa, FL plus 701,000 sf in 3-building park in northeast Charlotte.
- Risk mitigation through subordinated Sponsor equity in first loss position.
- 12.3% underwritten levered IRR / 1.39x multiple.

OAKLAND, CA SELF STORAGE

- Acquire “mom & pop” operated self storage property with significant operational upside.
- Capitalize on market volatility presenting opportunity to negotiate lower purchase price.
- Densely populated location with limited competitive product is expected to drive strong rent growth.
- 18.2% underwritten levered IRR / 1.6x multiple (preliminary)

Data is as of July 31, 2022. The Austin, TX Industrial Development, Miami, FL Multifamily Repositioning and Central PA Industrial Development were investments made in the period from April 1, 2022 to July 31, 2022. All other assets represent potential investments that are being considered by the Fund and are in various stages of diligence. There is no guarantee that the Fund will make any such potential investments. Any IRR or Equity Multiples referenced above are estimated gross Fund IRRs and equity multiples after any sponsor fees and promotes, based on information as of the date of underwriting and not a guarantee of future results. Such projections do not reflect investment management fees and other fees, which are charged at the Fund level. Please refer to the performance disclaimer and other disclosures at the end of the presentation.

¹² Short-term senior bridge loan investment expected to be recapitalized into JV equity after a lot line adjustment is obtained. SF represents the planned development.

¹³ Existing retail center planned for conversion to life sciences. SF represents the existing retail center.

¹⁴ Weighted average based on Net Fair Value (Effective Ownership %).

Information shown above reflects the Fund's effective ownership share of the gross fair value of the real estate investment. All active investments above are joint ventures other than 99 Ocean, Silver Beach Industrial Park, The Cliffs Lofts, 4000 1st Avenue South, 6000 Condor Drive, Northern Parkway Logistics, 22740 Temescal Canyon Rd, Forney Industrial Development, Oak Brook Regency Towers, and Westlake Commerce Center. Joint-venture investment partnerships are accounted for using the equity and the consolidated methods. The underwritten IRR and equity multiple are estimates based on information available at the time of underwriting and are not a guarantee of future results. They do not include the effect of investment management fees and other fees, which are calculated at the Fund level, or cash held at the Fund level and may not be reflective of the actual performance returns experienced by any one investor. Use of leverage may create additional risks. Please refer to the performance disclaimer and other disclosures at the end of this presentation.

COMPLIANCE STATEMENT: American Realty Advisors, LLC ("ARA") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. ARA has been independently verified for the periods January 1, 2001 through December 31, 2021. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled funds maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote ARA, nor does it warrant the accuracy or quality of the content contained herein.

THE FIRM: ARA is an investment adviser registered with the U.S. Securities and Exchange Commission under the Investment Advisers Act of 1940, as amended.

THE POOLED FUND: The Core Real Estate Investments Pooled Fund Report, which was created on November 21, 2003 and was formerly named the Core Commingled Real Estate Investments Composite, consists of one fully discretionary open-end limited distribution pooled fund managed by the firm using a Core strategy. The Inception Date was November 21, 2003 which represents the date on which the first investment-related cash flow took place. ARA defines a Core portfolio as one consisting primarily of direct or indirect investments in institutional quality, stabilized, income-producing industrial, residential, office and retail properties and other similar investments nationwide. ARA defines a discretionary portfolio as any portfolio over which ARA has full discretion regarding investment decisions. The firm defines a non-discretionary portfolio as any portfolio over which ARA does not have full discretion regarding investment decisions. The firm maintains lists of composite descriptions and limited distribution pooled fund descriptions, which are available upon request.

BENCHMARK: The benchmark for performance is the NCREIF Fund Index – Open-End Diversified Core Equity (NFI-ODCE) Value Weight which is made publicly available by NCREIF quarterly. NFI-ODCE Value Weight returns are value-weighted and shown leveraged before the deduction of any fees.

LEVERAGE: The pooled fund includes portfolio-level debt and assets that are leveraged using either fixed or variable debt. Total leverage in the pooled fund does not exceed 40% of its gross fair value. Some debt may be hedged using derivative securities, may require interest-only payments, or may mature before it is fully amortized.

CALCULATION OF PERFORMANCE RETURNS: Performance is stated in U.S. Dollars, is presented both gross and net of management fees, and includes the reinvestment of some income and the effect of cash and cash equivalents. Net of fee returns are reduced by actual asset management fees, and other expenses incurred in the operation of the real estate and the pooled fund. Performance returns are computed using investment level return formulas, which calculate time-weighted returns for real estate investments by geometrically linking component returns and have been adjusted for external cash flows. Past performance is not a guarantee of future results.

VALUATIONS: The pooled fund consists primarily of investments in real estate, investments in joint ventures invested in real estate, debt investments secured by real estate (collectively, "Real Estate Assets"), and some cash. Real estate values are based upon independent appraisals performed quarterly by a third-party valuation manager/appraiser in three quarters in any given year and by a third-party appraiser in the remaining quarter of such year. The third-party valuation manager/appraiser and the third-party appraiser are not affiliated with ARA or each other. Consistent with methodologies used by typical institutional investors, various approaches are considered during the determination of fair value, including the Income Approach, Sales Comparison Approach, and/or Cost Approach or methods applicable to the asset class and geographic region. Valuations of real estate involve subjective judgments and unobservable inputs, as the actual fair value price of real estate can be determined only by negotiations between independent parties in sales transactions. 100% of the Real Estate Assets involve such valuations. Policies for valuing investments, calculating performance, and preparing GIPS reports are available upon request.

FEES AND EXPENSE RATIO: Asset management fees will be paid to ARA quarterly in arrears and are calculated separately for each investor in the pooled fund at an annual rate determined based on capital commitments by each investor admitted to the pooled fund prior to January 1, 2015 and commitment amount less amounts redeemed to date for investors admitted after January 1, 2015. No other fees including performance fees or carried interest will be charged to investors. The annual rate is as follows:

Capital Commitment	Annual Rate
< \$25 million	110 basis points
\$25 - \$75 million	95 basis points
≥ \$75 million	85 basis points

The annualized expense ratio for the pooled fund as of December 31, 2021 was 1.16%.

* Assets under management represent the net value of all assets and accounts managed by ARA (excluding partners' share of equity and debt on partnership investments).

COMPLIANCE STATEMENT: American Realty Advisors, LLC ("ARA") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. ARA has been independently verified for the periods January 1, 2001 through December 31, 2021. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled funds maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote ARA, nor does it warrant the accuracy or quality of the content contained herein.

THE FIRM: ARA is an investment adviser registered with the U.S. Securities and Exchange Commission under the Investment Advisers Act of 1940, as amended.

THE POOLED FUND: The Value-Added Real Estate Investments Pooled Fund Report, which was created on December 30, 2009 and was formerly named the Value-Added Commingled Real Estate Investments Composite, consists of one fully discretionary open-end limited distribution pooled fund managed by the firm using a Value-Added strategy. The Inception Date was December 30, 2009 which represents the date on which the first investment-related cash flow took place. ARA defines a Value-Added portfolio as one consisting of real estate assets that have not reached full stabilization or that involve efforts to increase value and that tend to have more inherent risk than Core or Enhanced Equity portfolios. Investments in a Value-Added portfolio are made primarily in direct real estate or joint ventures formed to invest in real estate that is in various stages of development, mezzanine debt, and other similar investments nationwide, in or near major markets with above average growth potential. ARA defines a discretionary portfolio as any portfolio over which ARA has full discretion regarding investment decisions. The firm defines a non-discretionary portfolio as any portfolio over which ARA does not have full discretion regarding investment decisions. The firm maintains lists of composite descriptions and limited distribution pooled fund descriptions, which are available upon request.

BENCHMARK: The benchmark for performance is the NCREIF Fund Index - Open-End Diversified Core Equity (NFI-ODCE) Value Weight plus two hundred basis points. NFI-ODCE is made publicly available by NCREIF quarterly. NFI-ODCE plus 200bps returns are value-weighted and shown leveraged before the deduction of any fees.

LEVERAGE: In some cases, the use of leverage is a significant component of the value-added investment strategy. Fixed or floating rate debt may be used. Interest rate caps and swaps may be used when obtaining variable rate debt with the intention of fixing the variable rate when favorable. The pooled fund's leverage strategy takes into account a wide variety of factors and considers risks associated with the development, operating and leasing strategies of the

underlying investments. Total leverage in the pooled fund will not exceed 65% of the greater of (i) the gross fair value of the assets in the pooled fund or (ii) the initial gross investment cost of such assets.

CALCULATION OF PERFORMANCE RETURNS: Performance is stated in U.S. Dollars, is presented gross and net of management fees and other fees and includes the reinvestment of some income and the effect of cash and cash equivalents. Net of fee returns are reduced by actual asset management, incentive and other fees and other expenses that may be incurred in the operation of the real estate and the pooled fund. Performance returns are computed using investment level return formulas, which calculate time-weighted returns for real estate investments by geometrically linking component returns and have been adjusted for external cash flows. Past performance is not a guarantee of future results.

VALUATIONS: The pooled fund consists primarily of investments in real estate, investments in joint ventures invested in real estate, debt investments secured by real estate (collectively, "Real Estate Assets"), and some cash. Real estate values are based upon independent appraisals performed quarterly by a third-party valuation manager/appraiser in three quarters of any given year and by a third-party appraiser in the remaining quarter of such year. The third-party valuation manager/appraiser and the third-party appraiser are not affiliated with ARA or each other. Consistent with methodologies used by typical institutional investors, various approaches are considered during the determination of fair value, including the Income Approach, Sales Comparison Approach, and/or Cost Approach or methods applicable to the asset class and geographic region. Valuations of real estate involve subjective judgments and unobservable inputs, as the actual fair value price of real estate can be determined only by negotiations between independent parties in sales transactions. 100% of the Real Estate Assets involve such valuations. Policies for valuing investments, calculating performance, and preparing GIPS reports are available upon request.

FEES AND EXPENSE RATIO: Asset management fees will be payable to ARA quarterly in arrears and are calculated separately for each investor in the pooled fund at an annual rate based on invested capital in the pooled fund as follows:

Invested Capital	Annual Rate
First \$10 million	1.25%
Next \$15 million	1.20%
Next \$25 million	1.10%
Any amount thereafter	1.00%

The cash management fee on excess cash is 0.10% per annum, paid quarterly in arrears. ARA is also entitled to an acquisition fee of 0.60% on each new investment which is paid by a transaction counterparty or the pooled fund and an incentive fee, subject to a clawback, equal to 20% of any amount in excess of a 10% annual internal rate of return calculated over a 3-year period.

The annualized expense ratio for the pooled fund as of December 31, 2021 was 3.4%.

DISCLOSURES

The coronavirus outbreak (“COVID-19”) has been declared a pandemic and public health emergency by the World Health Organization and has spread throughout the United States and the world and has had and may continue to have adverse effects on the operations and financial performance of the ARA Core Property Fund, LP and American Strategic Value Realty Fund, L.P. (together, the “Funds”) and one or more of their investments.

COVID-19 has adversely impacted global commercial activity and contributed to significant volatility in certain equity and debt markets. In response, many countries, states, and municipalities have instituted quarantines, curfews, prohibitions on travel, social distancing measures, eviction moratorium orders and the closure of offices, businesses, schools, and other public venues, including certain infrastructure structures and facilities. Businesses have also implemented similar precautionary measures. Such measures have disrupted supply chains and economic activity and have had a particularly adverse impact on transportation, hospitality, tourism, retail and entertainment, among other industries.

With the increasing availability of effective vaccines, many of these measures are lessening in breadth and scope in the United States, but experts continue to predict localized outbreaks and such measures could be reinstituted as a result. The extent of COVID-19’s impact on the Fund and its investments will depend on many factors including, but not limited to, the duration and scope of the COVID-19 public health emergency; the extent of the government and business measures described above; the effectiveness and public adoption of vaccines; the impact on overall supply and demand, goods and services, investor liquidity, consumer confidence and levels of economic activity; any resulting litigation and the extent to which insurance coverages may apply; and the potential adverse effects on the health of ARA’s personnel, all of which are highly uncertain and cannot be predicted. These factors may have material and adverse effects on each Fund’s ability to source, manage and divest investments and achieve its investment objectives and could result in significant losses to such Fund.

This presentation does not constitute an offer to sell or the solicitation of an offer to buy any security, product, or service including interests in the Funds for which an offer can be made only by an offering memorandum of such Fund. Any interests in the Funds have not been and will not be registered under the U.S. Securities Act of 1933, as amended (the “Securities Act”), any other U.S. federal or state or non-U.S. securities laws or the laws of any non-U.S. jurisdiction. The information in these materials is intended solely for “Accredited Investors” within the meaning of Regulation D under the Securities Act and sophisticated investors who fully understand and are willing to assume the risks involved in the Fund’s investment program. Any security, product or service referred to herein may not be suitable for any or all investors.

The information in this presentation has been prepared from original sources, including as provided by American Realty Advisors, LLC (“ARA”), and is believed to be reliable and current as of the date specified, and ARA is under no obligation to inform you if any of this information becomes inaccurate. All information in this presentation is subject to and qualified in its entirety by reference to more detailed information appearing in the offering memorandum, limited partnership agreement, most recent quarterly report, ERISA statement (if applicable) and subscription materials of each of the Funds (collectively, the “Offering Documents”), which should be carefully read prior to any investment in such Fund and may be amended or supplemented from time to time.

This presentation is for informational purposes only, is confidential and may not be reproduced or distributed, or used for any purpose other than evaluating an initial or ongoing investment in the Fund. For a description of certain risk factors associated with an investment in either Fund, please refer to the risk factors and conflicts of interests sections of the applicable Offering Documents. This presentation is not for distribution in isolation and must be viewed in conjunction with the Offering Documents. To the extent there is any inconsistency between this presentation and the Offering Documents govern in all respects. No investment should be made based on this presentation. Any investment decision should be based solely upon the information in the Offering Documents.

DISCLOSURES

ARA CORE PROPERTY FUND – CERTAIN KEY RISK FACTORS

Prospective investors should be aware that an investment in the Fund is speculative and involves a high degree of risk, including a risk of total loss. The following is a summary of only certain risks of an investment in the Fund and is not an exhaustive list and is qualified in its entirety by the “Risk Factors” section in the Fund’s Offering Memorandum. Capitalized terms not defined herein shall be as defined in the Fund’s Offering Memorandum. Prospective investors should not construe the performance of the Fund in prior years as providing any indication of the future performance of the Fund.

Unspecified Use of Proceeds. The Fund intends to use the proceeds of the Offering to acquire and/or make investments in existing income-producing real property and to a limited degree development projects intended to produce income upon completion. Investors must rely upon the ability of the Manager in making such investments on behalf of the Fund. Except for the general investment guidelines provided in this presentation, there is no information as to the nature and terms of any investments that a purchaser of Units can evaluate when determining whether to invest in the Fund.

Real Estate Investments. The Fund’s investments are expected to involve the economic and business risks generally inherent in real estate investments of the type the Fund generally intends to make. A major risk of owning income-producing properties is the possibility that the properties will not generate income sufficient to meet operating expenses, to service any loans that are secured by the properties or to fund adequate reserves for capital expenditures. The income from properties may be affected by many factors, outside of the Manager’s control. Any return to the Limited Partners on their investment will depend upon factors that cannot be predicted at the time of investment, that may be beyond the control of the Fund, or that may be uninsurable or not economically insurable (such as losses caused by earthquakes, terrorism or floods). Such factors will also affect the return to the Limited Partners on their investment.

Identification of Suitable Investments. The Fund may be unable to find a sufficient number of investment opportunities to meet its investment objectives. The performance of the Fund will depend on the Manager’s ability to identify, secure, manage and divest investments that meet the Fund’s stated objective. There can be no guarantee that a sufficient number of appropriate investments will be available and that the Fund will therefore be able to invest all funds committed for investment by the Limited Partners.

General Economic Conditions. The Fund is exposed to the general economic and financial market conditions as well as the local, regional and national conditions that affect the markets in which it owns properties. For instance, the Fund’s operating performance is impacted by the economic conditions of the particular markets in which it has a concentration of properties. Any material oversupply of properties similar to those owned by the Fund or a material reduction of demand for such properties in markets involving similar types of use and/or customer base could adversely affect the Fund’s financial condition.

Expiration of Leases. The Fund derives most of its income from rent received from tenants. The Fund’s financial condition could be adversely affected if the Fund’s agents are unable to promptly re-lease or renew these expiring leases or if the rental rates upon renewal or re-leasing are significantly lower than expected. If a tenant experiences a downturn in its business or other type of financial distress, which may occur as a result of events outside of the tenant’s or the Fund’s control, such condition could have a negative impact on the Fund’s performance.

Use of Leverage. The use of leverage introduces the risk that cash flow from properties so encumbered, or from other sources, may not be sufficient to service the secured debt and therefore could result in the loss of the Fund’s equity through foreclosure or assets used to secure such indebtedness, the complete loss of capital invested in the particular real estate related to the indebtedness and, in some cases, recourse by the lender to foreclosure of assets. The Fund’s access to sources of financing will depend upon a number of factors over which the General Partner and/or Manager has little or no control. The Manager cannot assure investors that the Fund will have access to such equity or debt capital on favorable terms (including, without limitation, cost and term) at the desired times or at all, which could negatively affect the Fund’s results of operations. Changes in interest rates will affect the Fund’s operating results, as such changes will impact the interest the Fund receives on its floating-rate interest-bearing investments, the financing costs of the Fund’s debt, and any interest rate swaps that the Fund may utilize for hedging purposes.

Potential Losses May Not Be Covered by Insurance. If the Fund experiences a loss that is uninsured, or which exceeds policy limits, the Fund could lose the capital invested in the damaged properties as well as the anticipated future cash flows and could potentially remain obligated under any recourse debt associated with the properties. It is also possible that an insurance carrier fails or delays covering a loss due to an inability to meet its obligations or a dispute between the Fund and an insurance carrier. Government coverage requirements may also change in the future and such requirements may adversely impact the cash flow and value of properties.

DISCLOSURES

ARA CORE PROPERTY FUND – CERTAIN KEY RISK FACTORS

Future Investments. The Manager continues to evaluate the market of available properties that fit the Fund's investment objectives and will acquire properties on behalf of the Fund when opportunities that meet such objectives become available. The Fund's ability to acquire properties on favorable terms and to operate them successfully may be affected by any number of factors, including, but not limited to, its potential inability to acquire a desired property, whether the Manager is able to complete due diligence investigations to its satisfaction, the risk that market conditions may result in higher than expected vacancy rates and lower than expected rental rates, among others. At various times throughout the life of the Fund, as a result of competition, the Fund may be unable to acquire additional properties as the Manager desires or the purchase price may be significantly elevated. Any of the above risks could adversely affect the financial condition, results of operations or cash flow of the Fund.

Environmental Matters. Under various laws relating to the protection of the environment, a current or previous owner or operator of real estate may be liable for contamination resulting from the presence or discharge of hazardous or toxic substances at that property, and may be required to investigate and clean up such contamination at that property or emanating from that property. There can be no assurance that costs of future environmental compliance will not affect the Fund's ability to make distributions to its Limited Partners or that such costs or other remedial measures will not have a material adverse effect on its business, assets or results of operations.

Joint Ventures. The Fund may invest in properties through joint ventures, partnerships and other co-ownership arrangements (including senior and subordinate debt investments) with the sellers of the properties, developers, or with other persons. Such investments may involve risks not otherwise present, including, but not limited to, the Fund's joint venturer or partner in an investment might become bankrupt, that such person might have economic or business goals that are inconsistent with the business interests or goals of the Fund, or that such person may be in a position to take action contrary to the instructions or the requests of the Fund or contrary to the Fund's policies or objectives. The risk that the partner may take action contrary to the requests or objectives of the Fund are increased in those cases where the partner is the managing member of the partnership and the Fund's consent is only required with regard to a limited number of major decisions. Action by such joint venturer or partner might have the result of subjecting the property to liabilities in excess of those contemplated by the Fund. It may also be more difficult for the Fund to sell an interest in a joint venture or partnership than a wholly-owned property.

Dependence on Key Personnel. The success of the Fund will depend in substantial part upon the skill and management expertise of the real estate professionals of the Manager. Although the Manager operates using a variety of teams, there can be no assurance that the key real estate professionals of the Manager responsible for managing the day to day activities of the Fund will continue to be associated with the Manager. The loss of the key members, services of key members of the management group or a limitation in their availability could have an adverse effect on the operations of the Fund.

Valuation of Fund Investments. The Manager has arranged for quarterly valuations of each of the Fund's investments. Each real estate equity investment is appraised by an independent third party appraisal firm no less than quarterly, commencing the quarter after the investment is made. Appraisals and valuations are (i) inherently subjective in certain respects and rely on a variety of assumptions, including assumptions about projected cash flows for the remaining holding periods for the Fund's investments and (ii) based in large part on information at the time of the appraisal/valuation, and market, property and other conditions may change materially after that date. Furthermore, real estate assets generally cannot be marked to an established market or readily tradable assets. Accordingly, the appraised values of the Fund's investments may not accurately reflect the actual market values of the Fund's investments, and the Fund's value as determined in accordance with the appraisal/valuation procedures described above may be inexact and may not reflect the value of the Fund's underlying investments, and, thus, investors may make decisions as to whether to invest in or redeem Units without complete and accurate valuation information. In addition, any valuation is a subjective analysis of the fair market value of an asset and requires the use of techniques that are costly and time-consuming and ultimately provide no more than an estimate of value. Accordingly, there can be no assurance that the Fund's Net Asset Value, as calculated based on such valuations, will be accurate on any given date, nor can there be any assurance that the sale of any investment would be at a price equivalent to the last estimated value of such investment.

Liquidity of Investment. The Units may not be transferred without the prior written approval of the General Partner. Units may be redeemed at their current Per Unit Net Asset Value upon written notification to the General Partner. The effective date of redemption will be the next Valuation Date after receipt of a Redemption Notice. There may, however, be a significant delay in payment of the Redemption Price as the General Partner is not required to liquidate or encumber assets or defer investment in order to make redemption payments. In some instances, the General Partner may not be permitted to timely liquidate investments. Investments in real estate are subject to industry cycles, downturns in demand, market disruptions and the lack of available capital from potential lenders or investors (whether to finance or refinance portfolio properties or for potential purchasers of such properties). Lack of liquidity can also be due to REIT holding periods, limitations on the number of transactions a REIT can complete during a calendar year, contractual lock-ups or other restrictions. Accordingly, there can be no assurance that the Manager will be able to dispose of the Fund's properties in a timely manner and/or on favorable terms, and investment in the Units should be viewed as an illiquid long-term investment.

DISCLOSURES

AMERICAN STRATEGIC VALUE REALTY FUND – CERTAIN KEY RISK FACTORS

Prospective investors should be aware that an investment in the Fund is speculative and involves a high degree of risk, including a risk of total loss. The following is a summary of only certain risks of an investment in the Fund, is not an exhaustive list, and is qualified in its entirety by the “Risk Factors” section in the Fund’s Private Placement Memorandum. Capitalized terms not defined herein shall be as defined in the Fund’s Private Placement Memorandum. Prospective investors should not construe the performance of the Fund in prior years as providing any assurances regarding the future performance of the Fund.

General Economic Conditions. The Fund is exposed to the general economic conditions and the local, regional, national and global conditions that affect the markets in which it owns properties. The Fund’s operating performance is further impacted by the economic conditions of the particular markets in which it has a concentration of properties. Any material oversupply of properties similar to those owned by the Fund or a material reduction of demand for such properties in markets involving similar types of use and/or customer base could adversely affect the Fund’s financial condition.

Value Investment Strategy. The Fund’s investment strategy is a non-core, value investment strategy. The General Partner intends to employ a variety of tactical value investment strategies that focus on acquiring and repositioning assets, redevelopment, development including pre-development/entitlement, and exploiting pricing inefficiencies in assets or financial structures. The Fund’s value investment strategy involves greater risks than more conservative investment strategies. The risks related to these value investments include risks related to delays in the repositioning, improvement or development process and expected pricing inefficiencies that might not materialize. Actual costs might be higher than expected requiring additional equity or debt financing, and such increased capital investment might not result in the anticipated higher rents and occupancy rates necessary to provide an accretive investment return. In addition, the Fund’s properties may not produce revenue while undergoing capital improvements and generally will not produce revenue during new development and construction. Furthermore, the Fund may be unable to complete improvements and may be forced to hold or sell these properties at a loss. For these and other reasons, there can be no assurances that the Fund will realize growth in the value of its investments, and as a result, the Fund’s performance could be adversely affected.

Risks Related to Real Estate Ownership. While ARA will attempt to minimize the Fund’s exposure to risks relating to real property ownership through its investment due diligence process, the diversification of its portfolio, market research and ARA’s investment management capabilities, these risks cannot be eliminated. The factors that can affect real estate values include but are not limited to: (1) the attractiveness of the Fund’s properties to potential buyers, lenders or renters; (2) the location of the Fund’s investments; (3) supply and demand risk including competition from other available properties; (4) the Fund’s ability to provide adequate maintenance of, and insurance on, its properties; (5) the quality and philosophy of management; (6) the Fund’s ability to control variable operating costs; (7) governmental regulations, including but not limited to zoning, usage and tax laws, limits imposed on rents, and changes to or potential liability under these and other laws; and (8) other factors beyond the control of the General Partner.

Risks Associated with Development, Redevelopment and Repositioning Activities. The Fund may acquire direct or indirect interests in real property that is undeveloped or underdeveloped or requires redevelopment or repositioning. If it does so, it will be subject to the risks normally associated with such assets and development activities, including risks relating to the availability and timely receipt of entitlement, zoning, planning consents, licensing and other regulatory approvals, the cost and timely completion of construction (including risks beyond the reasonable control of the General Partner, such as weather, force majeure, public health emergencies or labor conditions or material shortages), unforeseen cost overruns associated with changes in regulations and the availability of both construction and permanent financing on favorable terms. These risks could result in substantial unanticipated delays or expenses and, under certain circumstances, could prevent completion of development activities. In addition, market conditions may change during the course of development, which may make such development less attractive than at the time it was commenced.

Leasing Risk. Where the Fund’s investments involve rental property, the Fund’s results of operations, distributable cash flow and the value of its Shares would be adversely affected if tenants are unable to meet their lease obligations. In the event of default by a significant number of tenants or larger tenants in rental property held by the Fund, the Fund may experience delays and incur substantial costs in enforcing its rights as landlord. The Fund’s operations and performance would also be adversely affected if the Fund is unable to lease and re-lease, on economically favorable terms, a significant amount of space in its real estate properties.

Joint Ventures and Other Non-Controlled Investments. There may be shared or limited control with respect to the Fund’s investments. The Fund may invest in properties through joint ventures, partnerships and other co-ownership arrangements (including preferred equity investments) with the sellers of the properties, operators, developers, or other third parties. In addition, the Fund may invest in real estate through senior and subordinated debt, or other debt investment structures with less ownership control and with borrower/sponsor risk. Structured equity and debt investments may involve risks not present in direct real estate investments with full equity ownership, such as the possibility that the other party(ies) may become bankrupt, have reduced liquidity or have economic or business interests or goals inconsistent with those of the Fund. Actions taken by these parties may subject the investment to liabilities in excess of or other than those contemplated by the General Partner. It may also be more difficult for the General Partner to sell the Fund’s interests in those investments. If control over an investment is shared with another party, deadlocks could result which could delay the execution of the business plan for the investment, require the Fund to engage in a buy-sell of the venture with the co-venturer or partner or conduct the forced sale of such investment which may adversely affect the investment’s returns or value. In the event a partner or the Fund defaults under the joint venture arrangement, the Fund may also suffer from a delay in executing the business plan of the investment, increased expenses due to mitigating the default and liability exposure to lenders or other parties. The risk that the partner may take action

DISCLOSURES

AMERICAN STRATEGIC VALUE REALTY FUND – CERTAIN KEY RISK FACTORS

contrary to the requests or objectives of the Fund are increased in those cases where the partner is the managing entity of the partnership and the Fund's consent is only required with regard to a limited number of major decisions. In addition, joint ventures and other entities in which the Fund invests may provide compensation to the other joint venturer or other parties in connection with the acquisition, financing, asset management, property management, leasing, development, construction and disposition of investments, including joint venture partner affiliates involved in execution and in such instances, potential conflicts of interest may increase. Moreover, the Fund may invest in equity investments that are senior to other equity holders in an investment entity which owns real estate. These preferred equity investments are usually entitled to receive a priority rate of return ahead of other equity holders but may have less control rights than such other equity holders and the return may be subordinate to debt financing.

Potential Environmental Liability. Real property is subject to federal and state environmental laws, regulations and administrative rulings that, among other things, establish standards for the treatment, storage and disposal of solid and hazardous waste. Real property owners are subject to federal and state environmental laws that impose joint and several liability on past and present owners and users of real property for hazardous substance remediation and removal costs, often without regard to whether the owner or operator knew of, or was responsible for, the release or presence of such hazardous substances. Accordingly, there may be exposure to substantial risk of loss from environmental claims arising in respect of any property with undisclosed or unknown environmental problems or as to which inadequate reserves have been established. The Fund cannot give any assurance that such conditions do not exist or may not arise in the future, and the presence of such substances on the Fund's real estate investments could adversely affect its ability to sell such investments or to borrow using such investments as collateral.

Alternative Property Sector Investments. In addition to the Fund's primary focus on industrial, multi-family, office and retail, the Fund may invest in alternative property sectors on a selective basis including but not limited to mixed-use, land, hotel, self-storage, age-restricted housing, senior housing, student housing, affordable housing, manufactured-housing, single family rental housing, self-storage, medical office, R&D/lab and data center. These property sectors can have increased risk due to lower market liquidity, structural impacts and idiosyncratic property sector or market fundamentals.

Dependence on Key Personnel. The success of the Fund will depend in substantial part upon the skill and management expertise of the employees of ARA. Although many members of ARA's management team will play an integral role in overseeing the Fund's activities, there can be no assurance that the key personnel responsible for managing the day-to-day activities of the Fund will continue to be associated with ARA or its affiliates. The loss of services from key members of the management group or a limitation in their availability could have an adverse effect on the Fund.

No Assurance of Profitability and Failure to Meet Targeted Returns. There can be no assurance that the Fund will be profitable or, if profitable, that any particular yield or rate of return will be obtained. The Fund's targeted returns for investments are based upon the General Partner's projections of a number of assumptions including but not limited to internal rates of return, which in turn are based upon projections of future growth rates of the Fund's investments and the applicable market, development and redevelopment and/or operating costs, and disposition timing and proceeds, all of which are inherently uncertain. The actual performance of the Fund's investments will differ from the projections of the General Partner and may differ materially.

Limited Rights and Dependence on the General Partner. All investment decisions for the Fund will be made by the General Partner and ARA (to the extent that the General Partner employs ARA as an investment adviser). Limited Partners will not be able to make any investment or other decision on behalf of the Fund and will have no right to take part in the management of, or otherwise control, the business of the Fund. Accordingly, no investment should be made in the Fund unless the investor is willing to entrust substantially all aspects of the administration and management of the Fund to the General Partner and ARA, as applicable.

Uncertainty of Net Asset Values. The Share value is based upon the Net Asset Value attributable to those Shares on the date a capital contribution is made by a new investor or redemption is paid to an existing investor. The Fund's Net Asset Value is determined in part on the appraisal and valuation of Fund assets. Appraisals are (i) inherently subjective in certain respects and rely on a variety of assumptions, including assumptions about projected cash flows for the remaining holding periods for the investments and (ii) based in large part on information as of the end of a calendar quarter, and market, property and other conditions may change materially after that date. Furthermore, real estate assets generally cannot be marked to an established market value nor are they readily tradable assets. Accordingly, the appraised values of Fund investments may not accurately reflect the actual market values of the investments and the Fund's value as determined in accordance with the appraisal procedures described above may be inexact and may not reflect the value of the Fund's underlying investments, and, thus, investors may make decisions as to whether to invest in or redeem Shares without complete and accurate valuation information. In addition, any valuation is a subjective analysis of the fair market value of an asset and requires the use of techniques that are costly and time-consuming and ultimately provide no more than an estimate of value. Similarly, certain of the Fund's liabilities may be valued on the basis of estimates. Accordingly, there can be no assurance that the Fund's Net Asset Value, as calculated based on such valuations, will be accurate on any given date, nor can there be any assurance that the sale of any investment would be at a price equivalent to the last estimated value of such investment.

DISCLOSURES

AMERICAN STRATEGIC VALUE REALTY FUND – CERTAIN KEY RISK FACTORS

Risks Related to Leverage. The Fund is subject to risks normally associated with debt financing, including the risk that the Fund's cash flow is insufficient to meet required payments of principal, interest and/or other financial obligations associated with debt financing. There can be no assurance that the Fund will be able to refinance any maturing indebtedness, that such refinancing would be on terms as favorable as the terms of the maturing indebtedness, or that the Fund will otherwise be able to obtain funds by selling assets or raising equity to make required payments on maturing indebtedness. The Fund's ability to refinance any debt financing in a timely manner and at favorable terms is dependent on several factors including, but not limited to, general economic conditions, the physical and financial condition of its assets, the Fund's credit ratings and interest rate levels or perceived creditworthiness. The Fund's borrowings also may bear interest at variable rates. Increases in interest rates would increase the Fund's interest expense under these borrowings.

Access to Financing May Be Limited. The Fund's access to sources of financing will depend upon a number of factors over which the General Partner has little or no control, including: general market conditions; commercial lenders' views of the quality of the Fund's assets; the Fund's eligibility to participate in, and access capital from, programs established by the U.S. government; and the Fund's current and potential future earnings and cash distributions. Dislocation or weakness in the capital and credit markets may adversely affect one or more lenders and could cause one or more lenders to be unwilling or unable to provide the Fund with financing or to increase the costs of that financing. Should regulatory capital requirements imposed on the Fund's lenders change, they may be required to limit or increase the cost of financing they provide to the Fund. This could potentially increase the Fund's financing costs and reduce the Fund's liquidity or require the General Partner to sell assets at an inopportune time or price.

Lack of Liquidity of Shares. No public or private market presently exists for Shares and none is expected to develop. Transferability of Shares is subject to compliance with applicable securities laws and also will be affected by limitations imposed under the Fund Documents, including the General Partner's right to approve a transfer as well as other limitations designed to assure continued qualification of a REIT Subsidiary as a REIT. Accordingly, there can be no assurance that the General Partner will be able to dispose of portfolio properties in a timely manner and/or on favorable terms and investment in the Shares should be viewed as an illiquid long-term investment. In addition, in connection with any disposition of an investment, the Fund may be required to make representations about the investment. The Fund also may be required to indemnify the purchaser of the investment to the extent that any such representations are inaccurate. These arrangements may result in the incurrence of contingent liabilities for which the General Partner may establish reserves or escrow accounts. Furthermore, a Limited Partner is not permitted to terminate any portion of its undrawn Capital Commitments until two years after the acceptance of its Subscription Agreement relating to such Capital Commitments.

Pricing in Redemption Transactions; Limitations on Redemption Rights. Limited Partners' ability to redeem their Shares is limited under the terms of the Fund Documents. Shares cannot be redeemed during the Redemption Lockout Period. After the Redemption Lockout Period, each Limited Partner will be entitled to have the Fund redeem its Shares on a quarterly basis upon 30 days' prior written notice to the General Partner at a price that reflects the Fund's Net Asset Value on the last day of the calendar quarter prior to the date of redemption. Except in limited circumstances, the redemption requests will be completed on a pro rata basis as liquid assets are available as determined by the General Partner in its discretion. The General Partner will have the right to determine the extent to which liquid assets are available for redemption or are necessary for ongoing expenses (including debt payments), investments, capital expenditures or reserves or are required to make payments to the General Partner of fees or other distributions under the terms of the Fund Documents.

Availability of Suitable Investments. ARA intends to acquire for the Fund, and the Fund intends to invest, only in properties in the United States that are suitable for the Fund and meet the Fund's investment criteria. Such properties may become available only occasionally and the Fund may not always be able to acquire such properties on favorable terms. A shortage of suitable properties in the major markets in the United States could delay investments by the Fund and adversely impact returns to investors. There can be no guarantee that a sufficient number of appropriate investments will be available and that the Fund will therefore be able to invest all funds committed for investment by the Limited Partners in a timely manner.

Possible Lack of Diversification. There is no assurance as to the degree of diversification that will be achieved in the Fund's investments, either by geographic region or asset type. As a consequence, the aggregate return of the Fund may be adversely affected. In addition, if the Fund makes an investment in a single transaction with the intent of refinancing or selling a portion of the investment, there is a risk that the Fund will be unable to successfully complete such a financing or sale. This could lead to increased risk as a result of the Fund having an unintended long-term investment and reduced diversification.

DISCLOSURES

Risks: Investments discussed in this presentation are expected to involve the economic and business risks generally inherent in real estate investments of the type the Fund intends to make. A major risk of owning income-producing properties is the possibility that the properties will not generate income sufficient to meet operating expenses, to service any loans that are secured by the properties or to fund adequate reserves for capital expenditures. The income from properties may be affected by many factors, including, but not limited to, fluctuations in occupancy levels, operating expenses and rental income (which in turn may be adversely affected by general and local economic conditions); the supply of and demand for properties of the type in which the Fund invests; energy shortages; compliance by tenants with the terms of their leases; collection difficulties; the enactment of unfavorable environmental or zoning laws; Federal and local rent controls; other laws and regulations; and changes in real property tax rates. The marketability and value of any properties of the Fund will depend on a number of factors beyond the control of the Fund, including, but not limited to, those previously described. Furthermore, there can be no assurance that a ready market for the properties of the Fund will exist at any particular time, since investments in real properties are generally considered to be more illiquid than publicly-traded securities. Any return to the investors on their investment will depend upon factors that cannot be predicted at the time of investment, that may be beyond the control of the Fund, or that may be uninsurable or not economically insurable (such as losses caused by earthquakes, terrorism, floods or public health emergencies). Such factors will also affect the return to the investors on their investment. Performance analysis is based on certain assumptions with respect to significant factors that may prove not to be as assumed. You should understand these assumptions and evaluate whether they are appropriate for your purposes. The description of certain risk factors in this presentation does not purport to be a complete enumeration or explanation of the risks involved in an investment in the Fund. Investors should read the Fund Offering Memorandum and consult with their own advisors before deciding to subscribe or invest. In addition, as the investment markets and Fund develop and change over time, an investment may be subject to additional and different risk factors. No assurance can be made that profits will be achieved or that substantial losses will not be incurred.

Photos: Photos used in this presentation were selected based on visual appearance, are used for illustrative purposes only, and are not necessarily reflective of all the investments in the Fund or the investments the Fund will make in the future.

Use of Leverage: ARA Core Property Fund is authorized to borrow up to 35% of the total gross value of the real estate assets owned by such Fund, and American Strategic Value Realty Fund is authorized to borrow, as measured immediately after such borrowing, up to 65% of the greater of (1) the sum of the Value Fund's net asset value and its unfunded capital commitments and (2) the sum of the Value Fund's gross investment cost in all of its portfolio investments and its unfunded capital commitments, and neither Fund is required to reduce debt in the event the total value of their real estate declines. Please review the applicable provisions in the respective limited partnership agreements and investment policy statements. The use of leverage introduces the risk that cash flow from properties so encumbered, or from other sources, may not be sufficient to service the secured debt and therefore could result in the loss of equity through foreclosure.

Performance Disclaimer: The ARA Core Property Fund leveraged returns after (net) the deduction of investment management fees and any other fees for the Q2 2022, One Year, Three Year, Five Year, Ten Year, and Since Inception periods were 4.58%, 29.41%, 12.02%, 9.91%, 10.00%, and 7.30%, respectively, and the American Strategic Value Realty Fund leveraged returns after (net) the deduction of investment management fees and any other fees for the Q2 2022, One Year, Three Year, Five Year, Ten Year, and Since Inception periods were 2.81%, 21.64%, 11.48%, 10.32%, 11.17%, and 12.27%, respectively. An investor's returns will be reduced by the fees described in ARA's Form ADV Part 2 Performance. Performance information is considered supplemental information and complements in the case of the Core Fund the attached Core Commingled Real Estate Investments Composite performance and in the case of the Value Fund the attached Value Added Commingled Real Estate Investments Composite performance. It is important to understand that investments of the type made by each fund pose the potential for loss of capital over any time period. Many factors affect fund performance, including changes in market conditions and interest rates in response to other economic, political, or financial developments. Investment returns, and the principal value of any investment, will fluctuate, so that, when an investment is sold, the amount received could be less than what was originally invested or that estimated at the time the investment was made. Use of leverage may create additional risks. To the extent a consultant wishes to share the returns with its clients who are not currently investors in the Fund, the consultant agrees to send the entire email or document to such clients only on a one on one basis.

NFI-ODCE Benchmark Information: The NFI-ODCE Value Weight ("NFI-ODCE" or "ODCE") is an unmanaged index published by the National Council of Real Estate Investment Fiduciaries ("NCREIF"). Any NFI-ODCE income returns are shown before (gross) the deduction of any investment management fees. Any NFI-ODCE total returns are shown before (gross) and after (net) the deduction of any investment management fees. Although each Fund may invest in similar property types as the NFI-ODCE, the weighting of each property type will differ from the NFI-ODCE in any measurement period.

DISCLOSURES

NPI Benchmark Information: NPI is the NCREIF Property Index, an unmanaged index published by NCREIF.

MSCI ACOE Benchmark Information: MSCI ACOE is an alternative U.S. private core real estate benchmark managed by MSCI in which the Core Fund participates along with 21 other core funds, 20 of which are in NFI-ODCE. ARA evaluates MSCI provided attribution analysis that differs from analysis possible from NCREIF data alone. Information provided in this presentation comparing the Core Fund to MSCI ACOE is provided in order to present additional information that is more readily available with this product. Although the Fund may invest in similar property types as the MSCI ACOE, the weighting of each property type will differ from the MSCI ACOE in any measurement period.

Altus Group comparative core information: Information referenced from Altus incorporates metrics utilizing valuation and other data derived from NPI-ODCE contributing funds.

Forward-Looking Statements: This presentation may contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 with respect to future financial or business performance, strategies or expectations. Forward-looking statements are typically identified by words or phrases such as "trend," "potential," "opportunity," "pipeline," "believe," "comfortable," "expect," "anticipate," "current," "intention," "estimate," "position," "assume," "outlook," "continue," "remain," "maintain," "sustain," "seek," "achieve," and similar expressions, or future or conditional verbs such as "will," "would," "should," "could," "may" or similar expressions. American Realty Advisors ("ARA") cautions that forward-looking statements are subject to numerous assumptions, risks and uncertainties, which change over time. Forward-looking statements speak only as of the date they are made, and ARA assumes no duty to and does not undertake to update forward-looking statements. Actual results could differ materially from those anticipated in forward-looking statements and future results could differ materially from historical performance.

Core Fund Annual Total Returns Since Inception (Net):
